

SIMO and the Environment

simo tritan finish

environmentally friendly water based uv finishing system

Tritan Finishing System:

- Fully enclosed & automated finishing line
- Water based, environmentally friendly
- UV (ultraviolet) cure, fully cured off the line
- Introduced by SIMO fall 2006
- Wood and Tex (Tritan Tex) finishes

Tritan and the Environment:

- Full water base finish (stain & lacquer)
- No solvents or toxins
- Enclosed system: materials are re-used/recycled and no air-bourne particles
- Meets or exceeds Greenguard and BIFMA furniture emission standards (FES-X7.1-2005)
- Helps qualify for LEED points/certification

Tritan and You:

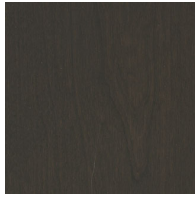

- UV cure: resilient harder finish when product is received
- No odour or off-gasing
- Automation provides consistent finish, sheen and texture
- Water-clear finish enhances the clarity and beauty of our wood products
- Industry leading product quality & environmental responsibility
